

## Amendments to the Claims

Please amend Claims 1 as follows. The changes are shown with ~~striketrough~~ for deleted matter and underlining for added matter. A complete listing of the claims is set out below with proper claim identifiers.

1. (Currently Amended ) A polymer composition comprising:

(A) a polymer containing chlorine atoms, the polymer being ~~produced~~ obtainable by polymerizing cationically polymerizable monomers with an initiator in the presence of a Lewis acid catalyst; and

(B) a double salt containing magnesium and aluminum as metal atoms wherein the double salt has an average particle size of 10 $\mu$ m or less.

2. (Original) The polymer composition according to Claim 1, wherein the polymer is an isobutylene block copolymer including a block which does not contain isobutylene as a principal component and a block which contains isobutylene as a principal component.

3. (Previously Presented) The polymer composition according to Claim 1, wherein the double salt containing magnesium and aluminum as metal atoms is a double salt of a hydroxide and a carbonate.

4. (Original) The polymer composition according to Claim 3, wherein the double salt containing magnesium and aluminum as metal atoms is a hydrotalcite.

5. (Previously Presented) The polymer composition according to Claim 2, wherein the double salt containing magnesium and aluminum as metal atoms is a double salt of a hydroxide and a carbonate.

6. (Previously Presented) The polymer composition according to Claim 5, wherein the double salt containing magnesium and aluminum as metal atoms is a hydrotalcite.
